Professional Summary

Senior Mobile Software Engineer & Architect with **7+ years of deep engineering experience** specializing in native Android (Kotlin, Jetpack Compose) and cross-platform Flutter (Dart) production systems. Proven expert in building high-performance, **offline-first mobile architectures**, maintaining 99.5%+ crash-free metrics, and scaling consumer utility platforms to **over 10 Lakh concurrent users**. Adept at managing custom Platform Channels, high-security local storage layers, complex GIS/GPS mappings, and optimizing heavy asynchronous data flows.

Technologies

Native Android: Kotlin, Java, Jetpack Compose, Android SDK, Android Jetpack, Coroutines

Cross-Platform: Flutter, Dart, Platform Channels

Architecture & State Management: MVVM, MVC, Clean Architecture, BLoC, Provider, Repository Pattern

Data & Networking: Room Database, Sqflite, Firebase Ecosystem, Retrofit, Dio, REST APIs

Dependency Injection & Testing: Dagger Hilt, GetIt, Unit Testing, Mockito

AI & Next-Gen Tooling: Agentic AI Architecture, AI-Driven Development, Cursor, LLM Prompt Engineering

DevOps & Collaboration: Jira, GitHub, GitLab, Agile / Scrum Methodologies, CI/CD Pipelines, Fastlane, Firebase Crashlytics

Mobile App Security: SSL / TLS Pinning, Secure Local Storage, Biometric Authentication, ProGuard / R8 Obfuscation, Encryption & Decryption

Professional Experience

Sr. Software Engineer, Asakta Electronics And Communication — Hyderabad, India **April 2025 – Present**

- **Architected an enterprise, offline-first mobile synchronization engine** utilizing cross-platform Flutter layers paired with custom native Android background worker services.
- **Designed a zero-latency API-centric infrastructure** leveraging Azure cloud and Firebase ecosystems, improving distributed real-time data sync speeds across hardware nodes by 25%.
- **Instituted rigid clean-code architecture frameworks (BLoC, MVVM, Clean)** and strict peer-review metrics across the mobile branch, reducing technical debt and production bug leaks by 30%.
- *Optional/Moved down:* Leveraged next-gen development environments (Cursor/LLMs) to automate boilerplate code setup, reducing sprint cycle feature delivery timelines by 25%.

Software Engineer, iRESlab Inc. — Noida, India

March 2020 – January 2024

- **Directed the full-lifecycle development** of secure, high-performance Android and Flutter applications deployed to thousands of concurrent active end-users.
- **Engineered a comprehensive automated code-testing matrix** (Unit testing, Mockito), driving up core application regression stability by 30%.
- **Modularized design tokens and interface components into shared micro-layouts**, cutting front-end layout engineering cycles down by 20% across multiple application suites.

Android Developer, MobileCoderz Technology — Noida, India

April 2018 – March 2020

- **Maintained an app crash-free metric above 99.5%** by leveraging automated analytics and monitoring systems via Firebase Crashlytics to proactively resolve runtime anomalies.
- **Built complex custom UI workflows** and integrated secure Google, Facebook, Twitter, and LinkedIn federated social authentications.
- **Partnered closely with product design leads** to bridge the gap between abstract wireframes and visually captivating, high-performance mobile front-ends.

Key Projects

My Meralco (Utility & Bill Payment Ecosystem) [Flutter, Dart, BLoC, REST APIs, Core Location, Secure Storage, Biometric]

- **Role:** Lead Flutter Developer
- **Scaled a high-impact utility platform to over 10 Lakh (1M+) concurrent users**, deploying a single, production-ready Flutter and Dart codebase across native Android, iOS, and Web environments.
- Integrated secure payment processing gateways and localized REST APIs to facilitate automated 24/7 account access, bill presentment, and digital transaction flows.
- Engineered complex device feature bindings—including hardware camera integration and media storage access modules—allowing field users to upload compressed real-time photographic outage reports.
- **Play Store:** https://play.google.com/store/apps/details?id=com.mymeralco.online&hl=en_IN

VCUBE [Flutter , Dart, Dio, Clean Architecture , Firebase, GetIt]

Role: Lead Mobile Developer

- Built an internal analytics and reporting application for SSEL (Shirdi Sai Electricals).
- Built interactive dashboards, charts, and tables displaying real-world analytics for secure, authorized internal stakeholders.
- **Play Store:** https://play.google.com/store/apps/details?id=com.asakta.vcube&hl=en_IN

Survey Pro [Flutter, Dart, BLoC, Sqflite, Clean Architecture, Dependency Injection, Firebase, GPS]

- **Role:** Lead Mobile Developer
- Built a paperless field data collection and smart utility mapping application designed for power distribution surveys and smart meter replacements.
- Implemented highly accurate real-time GPS location tracking, offline-first data caching for remote rural operations, and interactive map visualizations.
- **Play Store:** https://play.google.com/store/apps/details?id=com.asakta.survey.app&hl=en_IN

HyderaaSurvey [Flutter, Dart, BLoC, Clean Architecture, GetIt, Firebase, GPS Integration]

- **Role:** Mobile Application Engineer
- Developed a specialized mobile application for field officers under the Hyderabad Disaster Response and Asset Monitoring and Protection Agency (HYDRAA) to document geographical and hydrological features.
- Engineered secure dynamic questionnaire modules with built-in GPS verification and photo capture to eliminate manual data entry errors.
- **Play Store:** https://play.google.com/store/apps/details?id=com.pixelvide.hydra.survey&hl=en_IN

Survey Lite (CGIS - Real-Time Utility Mapping Engine) [Kotlin, Jetpack Compose, Room DB, MVVM, Dagger Hilt, Firebase, GIS APIs]

- **Role:** Lead Android Developer
- Eliminated manual post-survey engineering report compilation time by **100%** by designing a background worker architecture that instantly auto-generates formatted, print-ready validation documents.
- **Play Store:** <https://play.google.com/store/apps/details?id=com.pixelvide.android.ssel.smartmeter.survey>

SHTALK (Seamless Voice Messaging App) [Kotlin, Jetpack Compose, MVVM, Firebase RTDB, Firebase Storage, Android SDK]

- **Role:** Lead Android Developer
- Built a voice messaging app enabling users to exchange audio messages quickly and privately with contacts.
- Designed an easy-to-use interface for seamless, private voice communication.
- **Play Store:** https://play.google.com/store/apps/details?id=com.pixelvide.voicechat.app&hl=en_IN

Relevo [Android, Java, Retrofit, Firebase, QR Core Engines, Google Maps API]

- **Role:** Android Developer
- Built an app empowering environmentally conscious users to reduce disposable packaging waste through borrowing and returning reusable dishware.
- Promoted sustainable lifestyles and community-driven impact through packaging savings and behavior tracking.
- **Play Store:** https://play.google.com/store/apps/details?id=com.relevoapp&hl=en_IN

Education

IGNOU, Master of Computer Applications (BCA,MCA)
